

**Course Name** Math Course 2

Approved: August 26, 2024

**Unit Title** Unit 1 Proportional Relationships: Ratios, Rates, and Circles

## STAGE 1 | DESIRED RESULTS

Context and relevance for student learning

Standards	Transfer	
<p><b>CC.2.1: Numbers and Operations</b> CC.2.1.7.D.1 Analyze proportional relationships and use them to model and solve real-world and mathematical problems.</p> <p><b>CC.2.3: Geometry</b> CC.2.3.7.A.1 Solve real-world and mathematical problems involving angle measure, area, surface area, circumference, and volume.</p> <p>CC.2.3.7.A.2 Visualize and represent geometric figures and describe the relationships</p>	<p><i>Students will be able to independently use their learning to...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Analyze proportional relationships in real-world situations such as price analysis.</li> </ul>	
	Meaning	
	<p><b>UNDERSTANDINGS</b> <i>Students will understand that...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> You can use what you know about unit rates and dividing fractions to explore ratios that compare fractions.</li> <li><input type="checkbox"/> A proportional relationship is a relationship in which one quantity is a constant multiple of another. Knowing about ratios will help you explore proportional relationships.</li> <li><input type="checkbox"/> For any circle, the distance around the</li> </ul>	<p><b>ESSENTIAL QUESTIONS</b> <i>Students will keep considering...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> How do proportional relationships compare quantities?</li> </ul>

<p>between them.</p>	<p>circle divided by the distance across the circle through its center is always the same, a number called pi.</p>	
<p><b>Acquisition</b></p>		
	<p><i>Students will know...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> the use of scale factors</li> <li><input type="checkbox"/> ratios as related to proportions</li> <li><input type="checkbox"/> unit rate/constant of proportionality</li> <li><input type="checkbox"/> parts of a circle</li> </ul>	<p><i>Students will be skilled at...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> I can analyze proportional relationships and use them to model and solve real-world and mathematical problems.</li> <li><input type="checkbox"/> I can solve real-world and mathematical problems involving area and circumference.</li> <li><input type="checkbox"/> I can visualize and represent geometric figures.</li> </ul>

**Course Name** Math Course 2

**Unit Title** Unit 2 Numbers and Operations: Add and Subtract Rational Numbers

## STAGE 1 | DESIRED RESULTS

Context and relevance for student learning

Standards	Transfer	
<p><b>CC.2.1: Numbers and Operations</b> CC.2.1.7.E.1 Apply and extend previous understandings of operations with fractions to operations with rational numbers.</p> <p><b>CC.2.2: Algebraic Concepts</b> CC.2.2.7.B.3 Model and solve real-world and mathematical problems by using and connecting numerical, algebraic, and/or graphical representations.</p>	<p><i>Students will be able to independently use their learning to...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> use integers in their daily lives such as balancing bank accounts, temperature changes, etc.</li> </ul>	
	Meaning	
	<p><b>UNDERSTANDINGS</b> <i>Students will understand that...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> You can use what you know about positive and negative numbers and about addition on the number line to help you add with positive and negative numbers.</li> <li><input type="checkbox"/> Knowing how addition and subtraction are related will help you subtract with positive</li> </ul>	<p><b>ESSENTIAL QUESTIONS</b> <i>Students will keep considering...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> How do negative integers impact change?</li> </ul>

	and negative numbers.	
<b>Acquisition</b>		
	<p><i>Students will know...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> how to identify zero pairs</li> <li><input type="checkbox"/> what a negative number represents</li> <li><input type="checkbox"/> the meaning of opposite integers</li> <li><input type="checkbox"/> the meaning of absolute value</li> </ul>	<p><i>Students will be skilled at...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> I can compare and order integers.</li> <li><input type="checkbox"/> I can model and solve real-world and mathematical problems by using and connecting numerical, algebraic, and/or graphical representations.</li> <li><input type="checkbox"/> I can rewrite subtraction problems as addition of the opposite.</li> <li><input type="checkbox"/> I can solve real-world and mathematical problems involving the four operations with rational numbers.</li> <li><input type="checkbox"/> I can solve real-world and mathematical problems using numerical and algebraic expressions, equations, and inequalities.</li> <li><input type="checkbox"/> I can solve multi-step real-world and mathematical problems posed with positive and negative rational numbers.</li> </ul>

**Course Name** Math Course 2

**Unit Title** Unit 3 Numbers and Operations: Multiply and Divide Rational Numbers

## STAGE 1 | DESIRED RESULTS

Context and relevance for student learning

Standards	Transfer	
<p><b>CC.2.1: Numbers and Operations</b>            CC.2.1.7.E.1            Apply and extend previous understandings of operations with fractions to operations with rational numbers.</p> <p><b>CC.2.2: Algebraic Concepts</b>            CC.2.2.7.B.3            Model and solve real-world and mathematical problems by using and connecting numerical, algebraic, and/or graphical representations.</p>	<p><i>Students will be able to independently use their learning to...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> use integers in their daily lives for repeating circumstances such as average changes, rates of descent, etc.</li> </ul>	
	Meaning	
	<p><b>UNDERSTANDINGS</b>  <i>Students will understand that...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Extending the properties of operations to include operations with negative numbers can help you understand how to multiply and divide with signed numbers.</li> <li><input type="checkbox"/> You can divide an integer by any integer except 0, and the quotient is a rational</li> </ul>	<p><b>ESSENTIAL QUESTIONS</b>  <i>Students will keep considering...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> How do negative integers impact products and quotients?</li> </ul>

	<p>number. Rational numbers have decimal forms that either terminate or repeat.</p> <ul style="list-style-type: none"> <li>❑ You can write any division problem as a fraction, including problems with negative numbers.</li> </ul>	
<b>Acquisition</b>		
	<p><i>Students will know...</i></p> <ul style="list-style-type: none"> <li>❑ the meaning of an undefined quantity</li> </ul>	<p><i>Students will be skilled at...</i></p> <ul style="list-style-type: none"> <li>❑ I can model and solve real-world and mathematical problems by using and connecting numerical, algebraic, and/or graphical representations.</li> <li>❑ I can solve real-world and mathematical problems involving the four operations with rational numbers.</li> <li>❑ I can solve real-world and mathematical problems using numerical and algebraic expressions, equations, and inequalities.</li> <li>❑ I can solve multi-step real-world and</li> </ul>

		<p>mathematical problems posed with positive and negative rational numbers.</p> <ul style="list-style-type: none"><li><input type="checkbox"/> I can re-write fractions as decimals</li><li><input type="checkbox"/> I can classify decimals as terminating or repeating</li></ul>
--	--	--

**Course Name** Math Course 2

**Unit Title** Unit 4 Algebraic Thinking: Expressions, Equations, and Inequalities

## STAGE 1 | DESIRED RESULTS

Context and relevance for student learning

Standards	Transfer				
<p><b>CC.2.2: Algebraic Concepts</b></p> <p>CC.2.2.7.B.1 Apply properties of operations to generate equivalent expressions.</p> <p>CC.2.2.7.B.3 Model and solve real-world and mathematical problems by using and connecting numerical, algebraic, and/or graphical representations.</p>	<p><i>Students will be able to independently use their learning to...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> create and solve equations when there are unknowns in a real-world scenario</li> </ul>				
	<p style="text-align: center;"><b>Meaning</b></p> <table border="1" style="width: 100%;"> <thead> <tr> <th data-bbox="802 748 1287 781">UNDERSTANDINGS</th> <th data-bbox="1287 748 1776 781">ESSENTIAL QUESTIONS</th> </tr> </thead> <tbody> <tr> <td data-bbox="802 781 1287 1354"> <p><i>Students will understand that...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> You can apply properties of operations to generate equivalent expressions that reveal different aspects of a problem.</li> <li><input type="checkbox"/> You can use what you know about solving one-step equations to solve multi-step equations and inequalities.</li> </ul> </td> <td data-bbox="1287 781 1776 1354"> <p><i>Students will keep considering...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> How can an equation be used to represent relationships?</li> <li><input type="checkbox"/> How can an equation be used to solve a real-world scenario?</li> </ul> </td> </tr> </tbody> </table>		UNDERSTANDINGS	ESSENTIAL QUESTIONS	<p><i>Students will understand that...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> You can apply properties of operations to generate equivalent expressions that reveal different aspects of a problem.</li> <li><input type="checkbox"/> You can use what you know about solving one-step equations to solve multi-step equations and inequalities.</li> </ul>
UNDERSTANDINGS	ESSENTIAL QUESTIONS				
<p><i>Students will understand that...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> You can apply properties of operations to generate equivalent expressions that reveal different aspects of a problem.</li> <li><input type="checkbox"/> You can use what you know about solving one-step equations to solve multi-step equations and inequalities.</li> </ul>	<p><i>Students will keep considering...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> How can an equation be used to represent relationships?</li> <li><input type="checkbox"/> How can an equation be used to solve a real-world scenario?</li> </ul>				

	<ul style="list-style-type: none"> <li>❑ Reasoning about the effect of multiplying by a negative number can help you make sense of why the inequality symbol sometimes changes when you solve an inequality.</li> </ul>	
<b>Acquisition</b>		
	<p><i>Students will know...</i></p> <ul style="list-style-type: none"> <li>❑ the meaning of the terms: variable, constant, coefficient</li> <li>❑ the properties of equality</li> <li>❑ the difference between equations and expressions</li> <li>❑ the meaning of inequality symbols <math>&gt;</math>, <math>&lt;</math>, <math>\leq</math>, <math>\geq</math></li> <li>❑ when to change inequality symbols while solving an equation</li> </ul>	<p><i>Students will be skilled at...</i></p> <ul style="list-style-type: none"> <li>❑ I can apply properties of operations to generate equivalent expressions.</li> <li>❑ I can model and solve real-world and mathematical problems by using and connecting numerical, algebraic, and/or graphical representations.</li> <li>❑ I can use variables to represent quantities in a real-world or mathematical problem and construct simple equations and inequalities to solve problems.</li> <li>❑ I can solve real-world and mathematical problems using</li> </ul>

		numerical and algebraic expressions, equations, and inequalities.

**Course Name** Math Course 2

**Unit Title** Unit 5 Proportional Reasoning: Percents and Statistical Samples

## STAGE 1 | DESIRED RESULTS

Context and relevance for student learning

Standards	Transfer	
<p><b>CC.2.1: Numbers and Operations</b>            CC.2.1.7.D.1            Analyze proportional relationships and use them to model and solve real-world and mathematical problems.</p> <p><b>CC.2.4: Measurement, Data and Probability</b>            CC.2.4.7.B.1            Draw inferences about populations based on random sampling concepts.</p> <p>CC.2.4.7.B.2            Draw informal comparative inferences about two populations.</p>	<p><i>Students will be able to independently use their learning to...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> apply percentages to solve real-world problems involving interest rates, markup, discounts, coupons, commissions, tax, tip/gratuity</li> </ul>	
	Meaning	
	<p><b>UNDERSTANDINGS</b>  <i>Students will understand that...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Knowing how to reason proportionally can help you understand applications of percents, such as simple interest, percent change, and percent error.</li> <li><input type="checkbox"/> You can use proportional reasoning skills to draw conclusions about populations based on random samples.</li> <li><input type="checkbox"/> You can use what you know about data</li> </ul>	<p><b>ESSENTIAL QUESTIONS</b>  <i>Students will keep considering...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> How does a percent represent a significant change?</li> <li><input type="checkbox"/> How do you use a random sample to make an inference about a population?</li> </ul>

	distributions and measures of center and variability to compare two populations.	
<b>Acquisition</b>		
	<p><i>Students will know...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> that percentage is part of a whole</li> <li><input type="checkbox"/> that a percentage can be written as a decimal</li> <li><input type="checkbox"/> that samples represent part of the population</li> <li><input type="checkbox"/> the meaning of a random sample</li> <li><input type="checkbox"/> the significance of a random sample for representing a population</li> <li><input type="checkbox"/> know what a box and whisker plot represents</li> <li><input type="checkbox"/> the terms for measures of central tendency: mean, median, mode, range, quartile, inter-quartile range</li> </ul>	<p><i>Students will be skilled at...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> I can analyze proportional relationships and use them to model and solve real-world and mathematical problems.</li> <li><input type="checkbox"/> I can draw inferences about populations based on random sampling concepts.</li> <li><input type="checkbox"/> I can draw informal comparative inferences about two populations.</li> <li><input type="checkbox"/> I can use random sampling to draw inferences about a population.</li> <li><input type="checkbox"/> I can use statistical measures to compare two numerical data distributions.</li> </ul>

**Course Name** Math Course 2

**Unit Title** Unit 6 Geometry: Solids, Triangles, and Angles

## STAGE 1 | DESIRED RESULTS

Context and relevance for student learning

Standards	Transfer	
<p><b>CC.2.3: Geometry</b>            CC.2.3.7.A.1            Solve real-world and mathematical problems involving angle measure, area, surface area, circumference, and volume.</p>	<p><i>Students will be able to independently use their learning to...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> apply area of figures, as well as surface area and volume of prisms into real world scenarios such as painting, wrapping presents, and filling a pool with water</li> <li><input type="checkbox"/> decompose composite shapes to more easily calculate area, surface area, and volume</li> <li><input type="checkbox"/> visualize the slicing of a 3-D figure</li> </ul>	
<p>CC.2.3.7.A.2            Visualize and represent geometric figures and describe the relationships between them.</p>	<p><b>UNDERSTANDINGS</b>  <i>Students will understand that...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> You can use what you know about writing and solving equations to solve problems involving area, surface area, volume, and angle relationships.</li> <li><input type="checkbox"/> Knowing about surface area and volume of rectangular prisms can help you find the surface area and</li> </ul>	<p><b>ESSENTIAL QUESTIONS</b>  <i>Students will keep considering...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> How do you apply formulas to determine area, surface area, and volume of geometric figures?</li> <li><input type="checkbox"/> How do you slice 3-D shapes to produce 2-D shapes?</li> </ul>

	<p>volume of any type of prism and any figure composed of prisms.</p> <ul style="list-style-type: none"> <li>❑ Knowing about two-dimensional figures can help you identify the shape formed when a plane slices a three-dimensional figure.</li> <li>❑ You can use what you know about angles, triangles, and quadrilaterals to draw shapes with a given set of characteristics.</li> <li>❑ Knowing that special angles are formed when parallel lines are cut by a transversal</li> </ul>	
<b>Acquisition</b>		
	<p><i>Students will know...</i></p> <ul style="list-style-type: none"> <li>❑ Types of angles, 2-D shapes, 3-D shapes</li> <li>❑ Types of triangles</li> <li>❑ Triangle Inequality Theorem</li> <li>❑ Sum of the angles in a triangle is 180 degrees</li> <li>❑ Types of Special Angles formed by parallel lines cut by a transversal</li> </ul>	<p><i>Students will be skilled at...</i></p> <ul style="list-style-type: none"> <li>❑ I can solve real-world and mathematical problems involving angle measure, area, surface area, and volume.</li> <li>❑ I can visualize and represent geometric figures and describe the relationships between them.</li> </ul>

		<ul style="list-style-type: none"><li><input type="checkbox"/> I can identify and use properties of angles and their measures.</li><li><input type="checkbox"/> I can determine, area, surface area, and volume</li><li><input type="checkbox"/> I can apply properties of geometric figures.</li></ul>
--	--	---

**Course Name** Math Course 2

**Unit Title** Unit 7 Probability: Theoretical Probability, Experimental Probability, and Compound Events

## STAGE 1 | DESIRED RESULTS

Context and relevance for student learning

Standards	Transfer	
<p><b>CC.2.4: Measurement, Data and Probability</b>            CC.2.4.7.B.3            Investigate chance processes and develop, use, and evaluate probability models.</p>	<p><i>Students will be able to independently use their learning to...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> determine the likelihood of a given event such as rolling a number cube or choosing a card</li> </ul>	
	Meaning	
	<p>UNDERSTANDINGS  <i>Students will understand that...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> The probability of a chance event is a number between 0 and 1 that tells how likely the event is to occur. You can use proportional reasoning to understand probabilities and to make predictions about future events.</li> <li><input type="checkbox"/> You can use what you know about collecting</li> </ul>	<p>ESSENTIAL QUESTIONS  <i>Students will keep considering...</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> How can we base decisions on chance?</li> <li><input type="checkbox"/> How can probability be used to simulate events and to predict future happenings.</li> </ul>

	<p>and analyzing data to help you estimate the probability of a chance event.</p> <ul style="list-style-type: none"> <li>❑ Analyzing possible outcomes and using what you know about fractions, decimals, and percents can also help you determine probability.</li> </ul>	
<b>Acquisition</b>		
	<p><i>Students will know...</i></p> <ul style="list-style-type: none"> <li>❑ the difference between theoretical vs. experimental probability</li> <li>❑ what tree diagrams and lists represent</li> <li>❑ the meaning of likelihood, probability</li> </ul>	<p><i>Students will be skilled at...</i></p> <ul style="list-style-type: none"> <li>❑ I can calculate experimental and theoretical probabilities.</li> <li>❑ I can investigate chance processes and develop, use, and evaluate probability models.</li> <li>❑ I can apply probability to practical situations.</li> <li>❑ I can predict or determine the likelihood of outcomes.</li> <li>❑ I can use probability to predict outcomes.</li> <li>❑ I can list outcomes and identify the probability of a compound event.</li> </ul>
